

Faculty Student Success Dashboard

Faculty Student Success Dashboard (FSSD) empowers faculty to proactively engage with their students in ways that promote student success across a variety of indicators. This Dashboard is the first tool in its kind in the CSU system. With this Dashboard, faculty at Cal State Fullerton will be able to easily access individual academic performance, progress and success data (e.g. retention, graduation) of students who enroll in their courses and observe how their work is reflected in overall, as well as individual, student success indicators. This Dashboard aims to increase awareness of the role faculty play in student success. SOQ and Graded Class List can also be accessed from the Dashboard.

Graded Class List and SOQ are now available through
the Faculty Student Success Dashboard!
